To Whom It May Concern:

Moreland Primary School has been using STAR reporting program since 2005. From the very outset, STAR proved to be user friendly and there was excellent support from the administrators of the program when needed.

One of the great advantages of STAR is that it is a web-based program. Teachers are able to easily access their reports from home over a secure site. There is no need for data download and upload from school server to teacher laptops as is the case with other report programs.

Since 2005, the STAR administrators have continued to make improvements to the program, always striving to implement recommendations made by the school to make the program even better.

STAR is kept up to date with any changes to progressions points and VELs domains and dimensions. The end product is very professional with all formatting attended to by the administrators before the school embarks on the printing process.

I can highly recommend this program to any school that is looking for a change of report program. I would sum up STAR's best features as follows:

- \* web-based program
- \* ease of access from school or home
- \* excellent support from STAR administrators.
- \* school administrator easily make changes to program
- \* multiple user access to classes
- \* regular upgrades to program
- \* reasonably priced

Donna Schilov  
Acting Assistant Principal  
Moreland Primary School
